Summary

Full-stack developer specializing in the MERN stack (MongoDB, Express.js, React, Node.js), with hands-on experience building production-style applications such as a property booking platform and a role-based client management system. Comfortable across the stack, from responsive UI in React to REST APIs and database design, with a focus on writing scalable, maintainable code.

Education

Guru Ghasidas Vishwavidyalaya, Bilaspur, India

Expected Graduation: 2027

B.Tech in Computer Science & Engineering

- Relevant coursework: Computer Programming, Computer Networks, Computer Organization and Architecture, Operating Systems, RDBMS

Technical Skills

Languages: Java (Data Structures and Algorithms), C, JavaScript

Web Technologies: HTML, CSS, JavaScript

Frameworks & Libraries: React, Node.js, Express.js, Bootstrap, TailwindCSS

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, Vercel

CS Fundamentals: DBMS, Operating Systems, Computer Networks

Projects

Wanderlust — Property Listing & Booking Web Application

[GitHub](#) [Live](#)

- Built a full-stack, Airbnb-inspired platform where users can explore, view, and manage property listings, with detailed property pages, user reviews, and authentication.
- Implemented listing CRUD, image upload and display, and a review system on a responsive interface.
- **Technologies:** HTML, CSS, JavaScript, Bootstrap, Node.js, Express.js, MongoDB

TradeFlow — Secure Multi-Tenant Client Management Platform

[GitHub](#) [Live](#)

- Built a React.js client management platform with role-based access control and secure data isolation, ensuring clients access only authorized information while administrators manage individual client records.
- Designed backend services for authentication, client management, and secure data access using Node.js and Express.js.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, HTML, CSS, JavaScript, Vercel

SkillGap-AI — AI-Powered Skill Gap Analysis Platform

[GitHub](#) [Live](#)

- Built an AI-powered career analysis platform that evaluates a user's resume and skills against target job roles, identifies skill gaps, and gives personalized recommendations to improve job readiness.
- Integrated an AI API to parse resume content and generate role-specific skill-gap reports and learning recommendations.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, AI API

Experience

- Solved 100+ Data Structures & Algorithms problems on GeeksforGeeks, improving algorithmic problem-solving and coding proficiency.
- Developed and deployed full-stack applications using React.js, Node.js, Express.js, and MongoDB, with REST APIs, authentication, and database integration.
- Used Git and GitHub for version control and collaborative project development.
- Tested and debugged REST APIs using Postman and deployed web applications through Vercel.
